Internet Explorer

Enabling Javascript in Internet Explorer 7

NOTE: Javascript is enabled by default if your security settings are medium-low. If your security is set to high by your network administrator you may not have permission to enable Javascript.

1) Choose ‘Internet Options’ from the Tools menu:

2) Choose the security tab and click the ‘Custom level…’ button:

FireFox 3

Enabling Javascript in Firefox 3

1) Goto ‘Tools->Options’

2) Choose the content tab and ensure the Enable JavaScript checkbox is ticked.

NOTE: It is assumed that the Advanced features are set to the default settings as it is beyond the scope of this document to advise on these features.
