Internet Explorer

Enabling Javascript in Internet Explorer 7

NOTE: Javascript is enabled by default if your security settings are medium-low. If your security is set to high by your network administrator you may not have permission to enable Javascript.

1) Choose 'Internet Options' from the Tools menu:

2) Choose the security tab and click the 'Custom level...' button:

 $\sim \cdot \sim$ Settings $\sim \cdot \sim$

3) Scroll through the settings to 'Scripting' and ensure that 'Active Scripting' is enabled.

Security Settings - Local Intranet Zone								
Settings								
 Enable Websites in less privileged web content zone can navigate in Disable Enable Prompt Active scripting Disable Enable Prompt Allow Programmatic clipboard access Disable Enable Prompt Allow status bar updates via script 								
*Takes effect after you restart Internet Explorer								
Reset custom settings								
Reset to: Medium-low (default) Reset								
OK Cancel								

NOTE: It should NOT be necessary to restart your machine for this single change, however changes to the level of security will require a reboot.
