

# Running An Institutional Web Service: Exercises

## 4 Security and Performance Exercises

This exercise is intended for workshop participants who are particularly interested in Security and Performance issues. The exercise will form the basis for a discussion group on *Security and Performance Issues*.

Question	Response
Do you permit all users to publish web pages?  Mention any security / performance concerns you may have.	
Do you permit users to run CGI scripts?  Mention any security / performance concerns you may have.	
Do you support server-side includes?  Mention any security / performance concerns you may have.	
Do you allow users to access Java / ActiveX resources? Do you encourage them?  Mention any security / performance concerns you may have.	

Make a note of any comments on this exercise or any issues you may wish to raise at the discussion group.
